

FACT SHEET: FUSSY EATERS

WHAT YOU NEED

- NRG Stockgain /NRG Rewards bars
- Watering Can

Win the fight with your fussy friend at feeding time with some clever tips and proven products from the The NRG Team to help you save money, time and headaches!

PICKY EATERS

Add a small dose of undiluted Stockgain to any hard feed to encourage horses to finish their entire mix without any waste. This ensures your horse consumes the entire mix without trying to pick around or spit out certain grains they don't like.

HAY CLEAN-UP

Tired of seeing wasted hay scattered all over the paddock? Having trouble convincing your horse to eat the hay portion that is given? Simply mix a small amount of Stockgain into a watering can and pour over any new hay you leave in the paddock to greatly minimise wastage and significantly increase the chances of your horse eating all the hay that is provided.

MASKING MEDICINES

The rich sweet taste of Stockgain will mask any powders or liquid medicines that you need to administer to your horse. Many oral medicines and supplemental powders have strong unpleasant tastes that horses will flatly refuse. Once your horse is used to a highly-nutritious Stockgain infused hard feed, simply add your extra medicinal or supplemental powders or liquids to the feed and maximise the chances of your horse eating everything in the bucket without fuss. Try also using oral medicines in conjunction with the Stockgai infused NRG Rewards bars.
