

FACT SHEET: DRY/CRACKED HOOVES

WHAT YOU NEED

- NRG Stride Hoof Dressing or NRG No-Mess Hoof Cream
- Hoof Pick
- Soft bristled brush for application (if using Stride Dressing)
- Cloth to clean up

Dry hooves are a warning sign that your horse has unhealthy hooves and likely poor nutrition. If left untreated, it is likely that cracks will begin to appear and open up into foot sores, abscesses, and hoof infections. Worse still, pieces of hoof can break off under impact which will result in months of hoof and leg rehabilitation. Shoeing a horse with dry hooves is also extremely difficult with farriers often having trouble driving a nail or finding it very hard to trim, file or rasp the hoof.

STRIDE PRODUCT LINE-UP

Size	20kg	4kg	2kg	1kg
Price	\$200	\$59	\$37.95	\$23

Guide to RRP. Prices may not reflect freight and transport charges outside capital cities.

NRG Stride Hoof Dressing was developed to provide a nourishing and naturally black hoof dressing that will improve the health of the hoof while dressing it in preparation for shows and events. Applying NRG Stride Hoof Dressing is simple and will create a nourishing barrier that soaks into the hoof wall and looks great at the same time.

1
Always clean out feet. Ensure to properly clean out the frog and sole area. Check soles for any bruising or stones caught in the frog area.

2
Brush Stride Hoof Dressing well into parts of the sole and especially the frog and heel. This area is often overlooked.

3
Brush Stride Hoof Dressing over the hoof and the coronet band. Please don't forget the coronet band as this is the growth part of the hoof.

NRG TIP

NRG Stride Hoof Cream uses the same Stride formula but comes in a 'No-Mess' 500ml container with a free brush for easy application.
